Image report

The `img` elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.

Images with textual alternative

The following images have textual alternatives. Please review that the textual alternatives make sense considering the purpose of the image in the context of the page and that phrases like "Image of ..." are avoided.

Note that iconic images that are redundant with text next to them or purely decorative should have `alt=""` instead.

Image	Textual alternative	Location
Not resolvable	Logo of the Sahara Indomitable website.	From line 1, column 543; to line 1, column 832
Not resolvable	An algerian man of Kel Ahaggar heritage cooks Taguella in hot ashes.	From line 1, column 2875; to line 1, column 3189
Not resolvable	Logo of the Sahara Indomitable website.	From line 1, column 18771; to line 1, column 18932

class="section"> <p> <b>This Jordanian farm shows it's possible to grow vegetables in
the unlikelyest places, using lo-fi tech that's widely available </b> </p> <p> In one
of the world's driest places, water is flowing and crops are growing. Here in Aqaba on
```

Jordan's Red Sea coast, the desert farmers are at work. This is one of the world's most water-poor countries _ a place that imports 98 per cent of its food - yet cucumbers, peppers and passion fruit are thriving. </p><p> It's called the Sahara Forest Project, and it's showing how farming can adapt to the challenges of climate change and water scarcity. And this futuristic farm is just getting started. </p><p> The whole place runs on sunlight and seawater. Solar panels provide power for a system that evaporates seawater, helping keep air in the greenhouses cool and humid, while also removing salt. Around the greenhouses, plants that can tolerate salt are grown in hedges to provide further cooling. </p><p> In the shadows of solar panels, crops grow that wouldn't thrive in the harsh sunlight, such as herbs and salads. Farm workers pollinate plants by hand, and bring in wasps to provide natural pest control. Processes are being developed to turn waste products from the farm and other nearby businesses into fertiliser, so the farm enriches the soil rather than degrading it. </p><figure> <figcaption> Sahara Forest Project. 2011. [online]. [accessed: 2024/12/29]. Available at: https://farm5.static.flickr.com/4337/36909484042_1da02a3bd2_b.jpg </figcaption> </figure>

<p> Kjetil Stake, managing director of the Sahara Forest Project, says that too often, land is destroyed to make food. <q>Our project is an example of how you can reverse that. Showing that it's possible to produce food in a way which is good for the planet rather than bad for the planet.</q> </p><p> This year's main crop is snack cucumbers, in preparation for a large shipment to Norway in the autumn. Past harvests include salads, sweet potatoes, beans and herbs. Sahara Forest vegetables have been served to passengers on Costa cruise ships. </p><p> The story began in 2009 when the team behind the project got the chance to present their idea at the UN climate conference in Copenhagen. That led to an invitation from the king of Jordan, a pilot project in Qatar, and in 2016, construction of the Aqaba farm. </p><p> Now the desert farmers have proven that their idea works, the project is scaling up. A pipeline is being dug to replace the trucks that have been bringing the seawater, making it possible for the whole operation to absorb more carbon from the atmosphere than it puts in. The hope is to employ 200 people in Aqaba, and to bring the system to more desert locations. A project is already underway in Tunisia, and Stake says <q>the whole of north Africa is an opportunity</q>. Backers of the project include the Norwegian government, the European Union and the Bellona Foundation, a Norwegian NGO. </p><p> There's a social side to the project too, as the farm has helped to create jobs and, together with Al Hussein Technical University, provide training for young female engineers. </p><p> Stake says: <q>Climate scientists say we need a radical change in the way we produce food. And that is why we, over the last four years, have shown on the ground in Aqaba that it's possible to do something about those challenges: using saltwater, deserts and CO2 to produce what we need more of: sustainable food, water and clean energy</q>. </p><p> <q>What excites me is to show that it's possible. I'm so tired of people saying, nothing is happening, it's just problems, problems, problems. People believe what they hear, so if we can convey the message that it is possible, and it is commercially viable, then I think we can get that change much faster</q>. </p><figure> <div class="responsive-iframe"> <iframe src="https://www.youtube.com/embed/3aZ8E7hj8VU?si=x7qpZ-cv4ufd08sx" title="YouTube video player" allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture; web-share" referrerpolicy="strict-origin-when-cross-origin" allowfullscreen> </iframe> </div> <figcaption> Sahara Forest Project: From vision to reality </figcaption> </figure> </div><svg width="100" height="59" fill="none"><defs><clipPath id="logoClipper100"><path fill="#487779" stroke="#487779" d="M66.61 7.702c0 3.974-3.247 7.202-7.26 7.202-4.012 0-7.258-3.228-7.258-7.202S55.338.5 59.351.5c4.012 0 7.258 3.228 7.258 7.202Z"/><path fill="#487779" fill-rule="evenodd" d="M55.539 43.008a1 1 0 0 1-1.778-.001L39.55 15.418a1 1 0 0 0-1.778 0l-4.226 8.205a1 1 0 0 0 .43 1.346l.403.209a.857.857 0 1 1-.787 1.523l-.4-.207a1 1 0 0 0-1.347.43l-1.516 2.943a1 1 0 0 0 .43 1.346l.543.281a.857.857 0 1 1-.787 1.523l-.539-.279a1 1 0 0 0-1.348.43l-12.36 23.994a1 1 0 0 0 .89 1.458H81.66a1 1 0 0 0 .889-1.46L66.273 25.68a1 1 0 0 0-1.776 0z" clip-rule="evenodd"/><path fill="#487779" d="m66.274 25.68.888-.46zm-1.777 0-.889-.46zm18.052 31.481.888-.459zm-66.28.002-.89-.458zm13.707-24.424-.459.888zm-1.348.43.89.458zm1.887-.152.46-.888zm.787-1.523.46-.888zm-.973-1.627-.889-.458zm2.864-3.373.459-.888zm.4.207-.46.888zm.786-1.523.46-.889zm-.833-1.555-.89-.458zm.43 1.346-.46.889zm19.786 18.038.889-.458zm1.777 0 .888.46zM37.772 15.419l-.889-.458zm.889.458 14.212 27.589 1.778-.916L40.439 14.96zm-4.226 8.205 4.226-8.205-1.778-.916-4.226 8.205zm.404.209-.404-.21-.919 1.778.404.208zm-2.105 3.093.4.206.917-1.777-.4-.206zm-1.516 2.942 1.516-2.942-1.778-.916-1.516 2.942zm.543.28-.543-.28-.918 1.777.543.28zm-2.244 3.022.539.278.918-1.776-.539-.279zm17.157 57.62l12.36-23.994-1.778-.916-12.36 23.994zm44.648 0H17.157v2h44.648zm19.855 0H61.805v2H81.66zM65.385 26.139 81.66 57.62l11.777-.919-16.275-31.481zm-8.958 17.328 8.958-17.328-1.777-.918-8.957 17.328zm10.735-18.246c-.746-
